**SUBJECT: Core Drilling Activities, Chickamauga Lock, Tennessee River Mile 471.0**

Core drilling activities will begin in the area immediately downstream of Chickamauga Lock on 7 August 2006. While most of the drilling will be conducted outside of the lower approach channel, a few drilling points are located inside the lower approach. During the period that the drilling is being conducted inside the lower approach, traffic may be delayed to avoid interfering with the drilling operation. Drilling will be conducted during daylight hours, seven days-a-week. The drilling is anticipated to be completed by 28 August 2006.

Vessel operators transiting this area are requested to reduce speed and hold a safe distance off this site to reduce the possibility of their vessel's wake causing equipment damage or personal injury.

FOR THE DISTRICT ENGINEER:

-original signed-

JEFFREY D. ROSS  
Chief, Navigation Branch  
Operations Division
